****PLEASE DO NOT BIND, STAPLE, OR FOLD APPLICATION MATERIALS****

Major Works Pre-Qualification Renewal 2010

I, the undersigned, agree that:

My company would like to renew its “Pre-qualified” status with Powder River Energy Corporation (PRECorp);

My company is an **independent contractor** and agrees to perform the quoted services as an **independent contractor** and not as a sub-contractor, agent or employee of PRECorp;

My company is in compliance with all federal, state and local laws and regulatory agencies with regard to work place licensing. My company complies with generally accepted industry practices and all applicable federal, state and local laws and regulations with regard to work place safety including, but not limited to, adherence to OSHA 29 CFR 1910.269;

My company fully understands that pre-qualification by PRECorp is only a measurement tool to help ascertain my company’s ability to comply with PRECorp’s contractual specifications;

My company understands that the process of prequalification in no way negates the responsibility of my company to ensure all contractual specifications are met on an ongoing basis;

My company understands the pre-qualification approval of contractors to perform work on PRECorp’s system is not construed as an approval of my companies’ practices, policies and procedures or any other program that my company utilizes;

My company recognizes and agrees that PRECorp has the right to reconsider or reevaluate the pre-qualification status of my company at any time and for any reason and the sole judgment of PRECorp;

My company understands that any and all work performed on PRECorp lines must first be approved by an authorized PRECorp employee or agent and that only contractors that have been pre-qualified may perform work on PRECorp lines;

My company is qualified to provide the service(s) selected below; and further seeks pre-qualification to work on PRECorp’s system in the following areas:

DISTRIBUTION

- 25 kV Primary
- 600 Volt Secondary
- Overhead Construction
- Underground Construction
- Work on or near energized parts and conductors (hot work)

TRANSMISSION

- 69 kV Overhead Construction
- 230 kV Overhead Construction

SUBSTATION – Includes up to 230 kV air insulated

FIBER OPTIC – Includes installation, splicing and testing of fiber optic cable

STREET LIGHTING – Installation and maintenance

TREE TRIMMING – Near energized lines

OTHER (Please specify)

My company is providing the documentation required below as attachments to this Pre-qualification renewal. Please organize this documentation under the appropriate cover sheet provided below:
