Re: Docket No. 10014-190-CA-18, Record No. 14975
Compliance Filing - Construction Update

Dear Mr. Petrie,

The Wyoming Public Service Commission (Commission) issued Powder River Energy Corporation (PRECorp) a Certificate of Public Convenience and Necessity to site, design, construct, operate and maintain a new 69 kV High Voltage Distribution Line in Crook County. The name of this project is the *Butte/Little Mo 69 kV Power Line*.

In keeping with the Commission's Order that PRECorp shall comply with Section 229 of the Commission's Rules regarding construction reports. This update meets those requirements.

Project Class	Construction Category	Approx. % Complete	Comments
69 kV Line	Surveying & Const. Staking	100%	Completed in Sept. 2018
69 kV Line	Materials Distribution	100%	Completed in Dec. 2018
69 kV Line	Structure Framing	100%	Completed in Jan 2020
69 kV Line	Structure Erection*	95%	
69 kV Line	Conductor Installation	40%	
69 kV Line	Clean-up and Reclamation	70%	
69 kV Line	Overall Construction	55%	

*Construction had been delayed on this project in 2019 due to an active eagle nest located adjacent to the power line. The project was further postponed due to poor ground conditions in the fall of 2019 that were deemed unsuitable to support construction activities. Construction resumed in January 2020 and, weather permitting, will continue through February.

Please let us know if you have any questions.

Sincerely,

Michael E. Easley
Chief Executive Officer
