Mr. Chris Petrie Wyoming Public Service Commission Hansen Building, Suite 300 2515 Warren Avenue Cheyenne, WY 82002

Re: Docket No. 10014-172-CP-16

Dear Mr. Petrie,

Please find enclosed one (1) original and four (4) copies of Powder River Energy Corporation's Application and supporting documentation requesting approval of the proposed Cost of Power Adjustment and accompanying tariffs. Also enclosed is a filing fee check in the amount of \$5.00.

Thank you for your consideration.

Sincerely,

Michael E. Easley, CEO

Powder River Energy Corporation

### BEFORE THE PUBLIC SERVICE COMMISSION OF THE STATE OF WYOMING

IN THE MATTER OF THE APPLICATION OF	
POWDER RIVER ENERGY CORPORATION,	)
SUNDANCE, WYOMING, FOR AUTHORITY TO	) DOCKET No. 10014-172-CP-16
INCREASE ITS COST OF POWER ADJUSTMENT	)
BY \$18,393,590 PER ANNUM TO REFLECT A	)
CHANGE IN AVERAGE WHOLESALE POWER COSTS	j

#### APPLICATION

Powder River Energy Corporation ("the Cooperative") respectfully submits for Commission approval of this application for authority to adjust its Cost of Power Adjustment (COPA) pursuant to §§ 249 and 250 of the Rules of the Wyoming Public Service Commission (Rules) and in accordance with the COPA procedures set forth in the Cooperative's Billing Adjustments (BA) Tariff.

The Cooperative implemented a Cost of Power Adjustment as part of its general rate filing in 2001 (Docket No. 10014-CR-01-53). The COPA is a mechanism by which the Cooperative recovers and/or returns changes in wholesale power cost relative to the amount of power cost embedded in base retail rates. The current COPA became effective on January 10, 2016 (Docket No. 10014-165-CP-15).

The proposed COPA factors for the remainder of 2016 and all of 2017 in this Application have been designed based upon the base power cost approved in Docket No. 10014-145-CR-13.

The proposed COPA factors in this application reflect the projected cost of power for August 2016 through December 2017 using projected billing units for the period and the applicable wholesale rates effective August 1 2016. Tariff sheets affected are: 1, 1A, and 1B; Sheet No. 1C is not affected and has therefore been omitted from this filing. The wholesale rate from Basin has changed from the current rate which became effective in

January 2016. The proposed COPA factors also reflect the reconciliation of the COPA revenue for the months of October 2015 through May 2016 and the accrual of interest on any over-recovered balances during the true-up period. The COPA factors proposed in this application and the resulting increase in revenue are listed below:

	Existing	Proposed COPA	Change in
	COPA Factor	Factor	Revenue
All Rate Classes except			
LPT and LPT-CBM	\$0.003338	\$0.009131	\$9,239,798
LPT	\$0.005675	\$0.012685	\$8,059,004
LPT-CBM	\$0.003961	\$0.012181	\$1,094,788

The net change in revenues resulting from the proposed changes to the Cooperative's COPA factors is \$18,393,590, as shown in Exhibit A-2. This consists of a net change to 2016 revenues in the amount of \$5,547,214, with the remaining change in 2017 revenues. The proposed COPA factor will be adjusted to reflect the 2017 base rate once approved by the Wyoming Public Service commission as part of docket 10014-168-CR-16.

In support of this Application, the Cooperative states:

- 1. Company Operations. The Applicant is a non-profit cooperative electric utility organized and existing under, and by virtue of, the laws of the State of Wyoming. The Cooperative, pursuant to the laws of the State of Wyoming, is qualified to do business as a corporation within the State of Wyoming. The Cooperative is duly authorized to generate, manufacture, purchase, acquire, and transmit electric energy; sell supplies; and dispose of electric energy in its certificated territory. The rates charged by the Cooperative for its electric service have been established and placed in effect under appropriate Orders of the Commission.
- 2. Authority. This Application is filed pursuant to Wyoming Statute § 37-3-106, §249 and §250 of the Rules and the current COPA procedures set forth in the

Cooperative's Billing Adjustments (BA) Tariff (Original Sheets 34 through 38, approved in Docket No. 10014-145-CR-13).

- **3. Test-Year**. The test year for this application is based on projected sales for the August 2016 through December 31, 2017.
- 4. Wholesale Power Supply. The Cooperative is a Class A member of Basin Electric Power Cooperative (Basin Electric), in Bismarck, North Dakota, and purchases all of its power requirements through agreements and contracts with Basin Electric. The Cooperative has an all requirements contract with Basin Electric that extends through December 31, 2057.
- 5. Purchased Power Costs for 2016-2017. The Cooperative's projected purchased power costs for 2016-2017 are calculated to be \$193,264,388, as shown in Exhibit B-1. Of this total amount, \$81,441,719 and \$8,494,826 are the projected power costs for the LPT and LPT-CBM and General rate classes, respectively, as shown in Exhibits C-1 and C-2. The Cooperative's projected power costs are based on the Cooperative's projected demand and energy purchases for August 2016 through December 2017 and were calculated using Basin Electric's published Class A rates, Basin's Hybrid rate for Western Division purchases, and Western Area Power Administration's (WAPA) rates effective August 1, 2016. For the test year, the Cooperative's average wholesale power cost is projected to be 64.71 mills per kWh, compared to the projected average of 57.22 mills per kWh used to calculate the existing COPA factor.
- 6. Cost of Power Adjustment. The proposed Cost of Power Adjustment for 2016-2017 is equal to the sum of the recoverable power cost for 2016 and the over/under recovery for the 2015/2016 true-up period. The recoverable power cost for 2016/2017 is

calculated by taking the difference between the projected power cost for 2016/2017 and the base cost of power recovered through the Cooperative's retail rates. Adding the over-recovery from the 2015/2016 true-up period to the recoverable power cost for 2016/2017 results in a total projected Cost of Power Adjustment of \$30,769,313 as shown below:

Recoverable Power Cost for 2016	\$ 31,732,887
Under Recovery from True-up Period	(963,574)
Total Cost of Power Adjustment	\$30,769,313

Of this total, \$14,563,505 is associated with all rate classes other than the LPT and LPT-CBM rate classes (Exhibit A-1, Line 10); \$14,583,454,is associated with the LPT rate class (Exhibit A-1, Line 19); and \$1,622,355 is associated with the LPT-CBM and General rate classes (Exhibit A-1, Line 28).

The cost of power is calculated separately for the Cooperative's large power transmission rate classes in order to accurately reflect the assignment of fixed costs to each class. Basin Electric's Class A rate is applicable to wholesale purchases for the large power transmission classes, but the allocation of fixed cost is reduced over time as load growth increases for the remainder of the system. Separate COPA factors are necessary to track the change in power cost for these classes relative to the base power cost included in the base retail rates.

7. COPA Over/Under Recovery. The proposed COPA for 2016/2017 includes a reconciliation of COPA revenues for the months of October 2015 through May 2015. During this period, the Cooperative recovered \$4,725,149 from its members through the COPA, based on the difference between the projected cost of power for the period and the base cost of power recovered in the retail rates. In addition, \$108,227 was recovered from Cooperative's members that related to the true-up of a prior twelve-month

period. Therefore, total net amount recovered through the COPA during the current trueup period was \$4,833,376. The actual COPA revenue collected in the twelve-month trueup period is summarized on Exhibit S.

Exhibits E through L show the calculations of the COPA over/under recovery for each month in the true-up period. These calculations are summarized on Exhibit D. Additionally, Exhibit D shows the accrual of interest on any monthly over- or under-recovered balance for the rate classes during the Twelve (12) month true-up period.

The total system over-recovery for this time frame is \$854,128 and is included in the calculation of the COPA factors for 2016/2017 (Exhibit A-1). Of this amount, \$703,115 is an over-recovery from all customers other than the LPT and LPT-CBM rate classes; \$154,414 is an over-recovery from the LPT rate class; and \$19,487 is an under-recovery from the LPT-CBM rate class.

- **8. Supporting Documentation**. The Cooperative submits the testimony of Mr. David W. Hedrick and Exhibits A through T in support of this application.
  - **9. Tariff Rate Riders**. The proposed Tariff Rate Riders are included.
- **10. Contacts**. Communications in regard to this Application are to be addressed to Mr. Michael E. Easley, Chief Executive Officer for the Applicant, Post Office Box 930, Sundance, Wyoming 82729; Mr. Mark L. Hughes, Attorney for the Applicant, Post Office Box 456, Sundance, Wyoming 82729 and Mr. David W. Hedrick, C. H. Guernsey & Company, 5555 North Grand Boulevard, Oklahoma City, OK 73112-5507.

**WHEREFORE**, the Cooperative respectfully requests that the Commission, in accordance with Wyoming statutory provisions and the Commission's rules, enter an order effective September 1, 2016, authorizing the Cooperative to implement the proposed COPA for 2016.

Dated at Sundance, Wyoming this 12th day of July 2016.

### BEFORE THE WYOMING PUBLIC SERVICE COMMISSION

# DIRECT TESTIMONY OF DAVID W. HEDRICK C. H. GUERNSEY & COMPANY OKLAHOMA CITY, OKLAHOMA

### ON BEHALF OF POWDER RIVER ENERGY CORPORATION, INC.

#### Docket No. 10014-172-CP-16

1	0	Please state your name and business address.
1	Q.	Please state your name and pusiness address.

- 2 A. My name is David W. Hedrick and my business address is 5555 North Grand
- Boulevard, Oklahoma City, Oklahoma 73112-5507.

#### 4 Q. By whom are you employed and what is your position?

- 5 A. I am employed by C. H. Guernsey & Company. I am a Vice President of the
- 6 company and I work primarily in the area of Electric Rate Analysis.
- 7 Q. Please summarize your educational and professional background.
- 8 A. I have earned a Bachelor of Science degree from the University of Central
- 9 Oklahoma and an M.B.A. degree from Oklahoma City, University. I have been
- employed by C. H. Guernsey & Company since 1981.

#### 11 Q. Have you previously testified before regulatory commissions?

- 12 A. Yes. I have testified before the Arizona Corporation Commission, the Arkansas
- 13 Public Service Commission, the Oklahoma Corporation Commission, the Public
- 14 Utility Commission of Texas, and the Wyoming Public Service Commission.
- 15 Q. Whom do you represent in this proceeding?
- 16 A. I represent Powder River Energy Corporation ("PRECorp" or "the Cooperative").

#### 17 Q. What is the purpose of your testimony?

Page 1 of 6 July 2016

A. I will provide testimony describing the purpose and development of Cost of Power Adjustment (COPA) for the remainder of 2016 and all of 2017.

#### 20 Q. What is the purpose of the Cost of Power Adjustment?

- 21 Α. The COPA provides a mechanism by which the Cooperative can recover/return 22 changes in power cost increases or decreases relative to the amount of power 23 cost embedded in the base retail rates. The change in power cost can be a 24 result of an actual change in the wholesale rates charged by the Cooperative's 25 power supplier or as a result of a change in billing units that results in a change 26 in average power cost per kWh. The COPA ensures that the Cooperative's margins are not affected by changes in the wholesale cost of power and that any 27 28 increases or decreases are passed on to the Members of the system.
- Q. Has a COPA application already been approved to revise the COPA for 2016?
- A. Yes, an application was made on November 23, 2015 and an order was issued approving the COPA effective January 10, 2016.
- Q. Why is it necessary to make a COPA filing at this time when the current COPA became effective January 10, 2016?
- A. In June 2016 PRECorp was notified by its wholesale power provider, Basin

  Electric Power Cooperative (BEPC) that a wholesale rate change would become

  effective August 1, 2016. In order for PRECorp to recover the increased power

  cost expense it is necessary to make a COPA filing using Basin's new wholesale

  rate and to implement the new COPA at the same time the wholesale rate

  change becomes effective.
- Q. Do you anticipate making another COPA application for a new COPA factor
   to become effective in January 2017?

Page 2 of 6 July 2016

- A. At this time, it is expected that this COPA would be effective through the end of 2017. There may be a need to update the COPA prior to the end of 2017 if there is another wholesale rate change or a significant change in PRECorp's average cost of power that may occur as a result of rapidly changing usage behaviors.
- Q. Please describe the general process involved in developing the COPA for 2016/2017.
- 49 Α. The calculation of the COPA factor to be applied beginning in September 2016 is 50 the sum of two components: the projected over/under recovery of power cost for 51 2016/2017, plus a true-up of the over/under recovery for the prior period. The prior period over/under recovery includes October 2015 through May 2016, which 52 53 is the most recent month of actuals available. The projected power cost is based 54 on the wholesale rates applicable in August 2016, multiplied by the projected 55 billing units for 2016/2017. The prior period over/under recovery is determined 56 based on the actual COPA revenue recovered compared to the actual 57 recoverable power cost. In compliance with Wyoming PSC rules, an interest component has been added to each month in the prior period when the 58 59 Cooperative was in an over-recovered position.

#### Q. Please describe A-1.

60

61

62

63

64

65

66

67

A. **EXHIBIT A-1** is the summary schedule showing the development of the proposed 2016/2017 COPA factor for the three customer groups: Remainder of System, Large Power Transmission, and Large Power Transmission – CBM and General. The projected power cost for the three groups is developed on **EXHIBITS B-1, C-1,** and **C-2**. The base power cost in rates (per unit rates) is the amount approved in Docket No. 10014-145-CR-13. The base power cost in rates multiplied by the projected kWh sold produces the Base Power Cost in

Page 3 of 6 July 2016

Α.

Rates in dollars. Subtract this amount from the projected power cost to determine the recoverable power cost. The over/under recovery for the prior period is added to the recoverable power cost to determine the total amount to include in the COPA for 2016. This amount is divided by the total projected kWh to determine the factor to be applied.

#### 73 Q. Please describe EXHIBIT A-2.

- A. **EXHIBIT A-2** shows the calculation of the change in COPA revenue resulting from the application of the proposed COPA factor for 2016/2017. The change in revenue is calculated by applying the change from existing to proposed COPA factor to the projected kWh sold for 2016/2017. The total increase in revenue is \$18.393.590.
- 79 Q. Please describe the development of the projected power cost shown on EXHIBITS B-1, C-1, and C-2.
  - **EXHIBIT B-1** is the calculation of the projected total 2016/2017 power cost for the system. The projected billing units were developed by the Cooperative based on the projected demand and energy requirements for 2016/2017. The wholesale rates used to develop the projected power cost are the rates to be applied beginning in August 2016, which include Basin Electric's published Class A rates, Basin's Hybrid rate for Western Division purchases, and WAPA's (Western Area Power Administration) rates, which apply to the small WAPA allocation the Cooperative receives through Basin Electric.
    - **EXHIBIT C-1** shows the calculation of the projected power cost for the Large Power Transmission class based on the projected billing units for 2016/2017 and the effective Basin Rate to be applied beginning in August 2016. **EXHIBIT C-2** shows the calculation of the projected power cost for the Large Power

Α.

93 Transmission – CBM and General class based on the projected billing units for 94 2016/2017 and the effective Basin Rate to be applied beginning in August 2016.

#### Q. What is the projected change in COPA revenue?

96 A. The Application of the proposed COPA for 2016 results in an increase in COPA
97 revenue of \$18.393.590. **EXHIBIT A-2** shows the change in both the
98 recoverable power cost component and the over/under recovery component of
99 the COPA factors.

### Q. Please describe the Summary of COPA Over/Under Recovery, shown on EXHIBIT D.

Column (a) of **EXHIBIT D** is the number of days in the month for purposes of calculating the interest on any over-collected balance. Column (b) provides the summary of the actual over/under recovery for the months of October 2015 through May 2016, as developed on **EXHIBIT E** through **EXHIBIT L** for each individual month. Column (c) is the component of the COPA revenue for a prior year true-up. Column (d) is the sum of the prior month's total over/under recovery (which includes interest) plus column (b) and column (c). Column (d) is the amount upon which monthly interest is calculated. Column (e) is the applicable interest rate for the period. Column (f) is the calculation of interest based upon the balance in column (d), the number of days in Column (a), and the interest rate in column (e). Column (g) is the sum of columns (d) and (f).

#### Q. What does the May 2016 balance for each of the three groups represent?

The balance at May 2016 represents the amount by which the COPA is over/under recovered for the customer group. The May 2016 balances shown on **EXHIBIT D** are included in the calculation of the 2016/2017 COPA factor on **EXHIBIT A-1** as an over/under recovery amount for the prior period.

Page 5 of 6 July 2016

120

121

122

123

124

125

126

127

118	Q.	Please describe the development of the monthly over/under recovery as
119		shown on EXHIBITS E through L.

- A. The summary of the actual power cost for the three different groups is shown on **EXHIBITs Q**, **R-1**, and **R-2**. The base cost in rates (per-unit rates) is the amount included in the Cooperative's Billing Adjustment tariff. This base power cost multiplied times the actual kWh sold for the period determines the actual base power cost (in dollars). The actual power cost less the base power cost in rates provides the recoverable power cost for the period. The recoverable power cost less the actual COPA revenue provides the amount of the over/under recovery for the period.
- Q. Has the Cooperative confirmed that the power cost as projected representsthe best option available?
- 130 A. The Cooperative has a long-term all requirements purchase agreement with
  131 Basin Electric and therefore does not have the ability to choose a different power
  132 supplier.
- 133 Q. What financial information has the Cooperative provided as an indication of 134 the current financial condition of the Cooperative?
- A. **EXHIBIT T** is the comparative income statement reflecting the Adjusted 2012 test year as approved in Docket No. 10014-145-CR-13, the Actual 2015 period and the Budgeted 2016 period which includes the revised COPA for 2016. The operating margins and financial ratios indicate that the Cooperative is not in an over-earnings position.
- 140 Q. Does this conclude your testimony?
- 141 A. Yes, it does.

KATE BASE CALCULATED 200,087,725 214,595,459 210,250,515	RATE BASE CALCULATED *		206,687,725		214,595,459		210,256,515

<sup>\*</sup> The Rate Base calculation in column A varies slightly from the calculation in the actual rate filing due to an adjustment for property tax In the rate filing, property tax was removed from the functional accounts and reported on Line 13 - Tax Expense Property & Gross Receipts In the Rate Base calculation above, the property tax was moved back to the functional accounts to which it was actually charged This adjustment allows for better comparison with 2013 and the 2015 budget year
